Projects

DigiCraft Artisan Marketplace — Java, JSP, Servlets, MySQL

- Developed a web-based marketplace connecting rural artisans with buyers through a role-based system.
- Implemented Admin, Artisan, and Buyer modules for product management and order handling.
- Enabled artisans to add and manage products while buyers can browse and place orders.
- Admin can monitor users and manage overall platform activities efficiently.

Job Portal System — Java, JSP, Servlets, MySQL

- Developed a web-based job portal connecting job seekers and recruiters using a role-based system.
- Implemented user registration, authentication, profile management, and job application features.
- Recruiters can post and manage job listings while users can search and apply for jobs.
- Added features like application tracking and admin management for efficient platform control.

Certifications

- **R3 SYSTEMS Pvt. Ltd.** — Java Development Training
- **Nodevember 3.0** — 5-days Backend Development Workshop covering Node.js, Express.js, and MongoDB
